If you do not configure this policy setting, the default printer is not specified at the Group Policy level.. By default, Remote Desktop Services automatically designates the client default printer as the default printer in a session on an RDS host.. If for any reason the Remote Desktop Easy Print printer driver cannot be used, the client printer is not available for the Remote Desktop Services session.

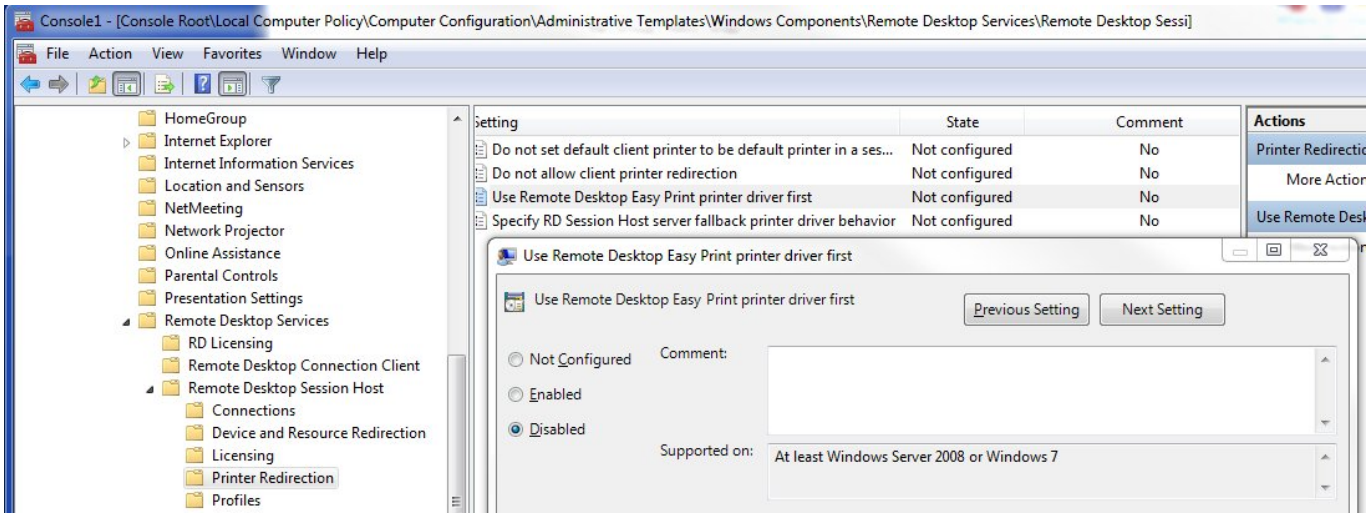
1. how to disable remote desktop easy print driver
2. remove remote desktop easy print driver

The Easy Print driver doesn't work correctly for this printer as half the time it just prints garbage instead of the actual document so I want to change it to use the correct driver.. If you disable or do not configure this policy setting, all client printers are redirected in Remote Desktop Services sessions.. The available options are Note If the 'Do not allow client printer redirection' setting is enabled, this policy setting is ignored and the fallback printer driver is disabled.. I tried to delete the Remote Desktop Manager app and putting it back in but no avail.. No remote printers are mounted 2 Connect to terminal server using Microsoft Remote Desktop.

how to disable remote desktop easy print driver

how to disable remote desktop easy print driver, disable remote desktop easy print printer driver first, remove remote desktop easy print driver

Specify RD Session Host Server fallback printer driver behavior Use this policy setting to specify the RDS host fallback printer driver behavior.. If the RDS host does not have a printer driver that matches the client printer, the client printer is not available for the Remote Desktop session.. If you disable this policy setting the RD Session Host server tries to find a suitable.. I have selected the check box for Printer on the Local Resources tab The printers will not show up.. If for any reason the Remote Desktop Easy Print printer driver cannot be used, a printer driver on the RDS host that matches the client printer is used.



remove remote desktop easy print driver

10 so I do no know if it is a OS X version thing or not Well, by default redirected printer will use Microsoft Easy Printer driver, but this driver doesn't work for all the printers from all OEMs.. Description Do not set default client printer to be default printer in a session Use this policy setting to specify whether the client default printer is automatically set as the default printer in a session on an RDS host.

If you do not configure this policy setting, client printer mapping is not specified at the Group Policy level.. Note If the 'Do not allow client printer redirection' policy setting is enabled, the 'Use Remote Desktop Easy Print printer driver first' policy setting is ignored.. When I connect using the Microsoft Remote Desktop app I do get the printers to redirect.. If you enable this policy setting, only the default client printer is redirected in Remote Desktop Services sessions.. Despite all my searching the only fix I've found is to change the GPO for the 2008 server using this setting.. Printers mount 3 Reconnect to Terminal Server using RemoteDesktop Manager No remote printers are mounted.. You can verify if any event ID 1111 has been created on the server during the logon, for information about 1111: After installing the OEM driver on the server, you can consider to disable 'Use Terminal Services Easy Print printer driver first' GPO to avoid using easy printer driver.
